The chaise-longue by Le Corbusier, the radio by Rams, the chair by Eames – designers make things into cult objects and become icons themselves. But who knows which coupé was designed by Frua, which limousine by Engel, which station wagon by Opron? For a long time, car design was considered to be anonymous, the designers stood in the shadow of the perception of the design, even though their designs can be found on the roads in millions. This richly illustrated book captures the origin of a profession and maps the development of car design based on a comprehensive introduction and the career biographies of over 200 selected designers who contributed to the design of cars and many different associated products in the USA, Europe, and Japan between 1900 and 2000.

The Lamborghini Urraco. The little baby Lambo that was meant to beat the Porsche 911 and Ferrari 308, but which ran into a myriad of problems. This book shows what really happened, and why the car never got the chance it deserved. The Urraco lived on as the Silhouette and Jalpa, and the Jalpa was greatly responsible for keeping the Lamborghini brand alive in the 80s. The full story of these V8 Lamborghinis is told here, with exclusive interviews from the leading figures behind the cars. The book also includes detailed chapters on what to look out for when buying one of these future supercar classics. Hundreds of amazing photos never published before makes this the ultimate book on the V8 Lamborghinis.
