This popular national and international best seller is a must for your library! The fourth edition features new, updated test questions based on the very latest edition of the Praxis examination. It is a comprehensive review, study guide, textbook and reference rolled into one. Only the most current, important, and relevant information is extracted from the entire field of speech-language pathology. Each chapter includes practice questions in multiple-choice formats, along with answers. Quick response codes (QR codes) throughout the chapters can be scanned to lead you immediately to relevant websites with extended information. More than 500 contemporary references have been added, and current topic areas (e.g., telepractice, addressing the needs of medically fragile infants) are addressed. The appendix gives practical test-taking strategies based upon the latest version of the Praxis exam--readers are sure to boost their chances of passing the first time! Experienced professionals will find this resource to be a helpful, quick reference for the very latest updated information in a wide variety of areas.

First Edition a 2013 Doody's Core Title and AJN Book of the Year Award Winner! This text provides top-tier guidance for DNP students, graduate faculty, APRNs and other healthcare providers on how to use available research for improving patient outcomes and reducing costs. It is the only resource written expressly to meet the objectives of DNP courses. This second edition is completely updated and features three new approaches—umbrella reviews, mixed method reviews, and other types of reviews--for seeking, synthesizing, and interpreting available evidence to improve the delivery of patient care. The text also includes two new examples of completed systematic reviews and two completed proposals. The book presents, clearly and comprehensively, the knowledge and skills necessary to conduct a foundational comprehensive systematic review (CSR). It encompasses the complexities of the entire process, from asking clinical questions to getting the evidence into practice. The text includes question-specific methods and analysis and compares CSR methods, literature reviews, integrated reviews, and meta-studies. It describes how to find and appraise relevant studies, including the non-published “grey” literature and criteria for selecting or excluding studies, and describes how to use the results in practice. Also examined are ways to disseminate findings to benefit clinical practice and support best practices, and how to write a CSR proposal, final report and a policy brief based on systematic review findings. Plentiful examples, including two completed proposals and two completed systematic reviews, demonstrate every step of the process. An expanded resource chapter that can serve as a toolkit for conducting a systematic review is also provided. The text also covers useful software and includes objectives, summary points, end-of-chapter exercises, suggested readings and references. New to the Second Edition: • Three new chapters presenting new systematic review approaches: umbrella reviews, mixed method reviews, and other types of reviews including rapid and scoping reviews and reviews of text and opinion • Two new examples of completed systematic reviews • Completely updated content throughout • Detailed information to foster systematic review research question development, efficient literature searches, and management of references Key Features: • Delivers the knowledge and skills necessary to conduct a CSR from start to finish • Serves as the only CSR resource written expressly for the advanced practice nurse • Describes useful software for conducting a systematic review • Provides rich examples including two completed CSRs • Includes objectives, summary points, end-of-chapter exercises, suggested readings and references • Provides a comprehensive toolkit of resources to complete a systematic review

Named a 2013 Doody's Core Title! 2012 Second Place AJN Book of the Year Award Winner in Advanced Practice Nursing! iThis book comprehensively and concisely examines the complexities related to asking clinical questions, searching for the evidence, appraising and summarizing the evidence, and getting evidence into practice. I commend this book to health professionals who are seeking to do the best they can in health care. î --Alan Pearson, AM The Joanna Briggs Institute Faculty of Health Sciences, University of Adelaide In an age of rapidly expanding knowledge, it is crucial for health professionals to stay abreast of the most current evidence-based information when making clinical decisions. This textbook is specifically designed to meet the objectives of the Doctor of Nursing Practice (DNP) competency that relates to iClinical Scholarship and Analytical Methods for Evidence-Based Practice. It provides the knowledge and skills necessary for DNP students, faculty and advanced practice nurses to conduct a comprehensive systematic review (CSR). The text sets forth a rigorous, step-by-step approach to the process of conducting a literature search, including both quantitative and qualitative studies, as well as igreyi literature. It describes how to extract and synthesize the most relevant data, how to integrate systematic reviews into practice, and how to disseminate the results. The volume begins by addressing the basic concepts of systematic reviews and their relationship to clinical practice and policy, before delineating the systematic steps of this process along with the development of a systematic review proposal and clinical question. The book then describes how to find and select the best available evidence and explores specific types of systematic reviews, including experimental, observational, and economic evidence, and explores the current and future use of the process. End-of-chapter application exercises, questions for review, objectives, summary points, and references facilitate learning. Mastery of the CSR process and application of the resultant evidential summaries will be of utmost benefit to nursing practitioners seeking to provide care according to the most current evidence-based knowledge. Key Features: Tailored specifically for graduate nursing courses in evidence-based practice Describes how to find and appraise relevant studies, including nonpublished igreyi literature and offers criteria for selecting or excluding studies Guides readers through the process of searching the literature for evidence based on the review question Explains how to integrate systematic review outcomes into practice Compares CSR methods, review of literature, integrated review, and meta-studies

This book contains a collection of essays written in honor of Wolfhart Zimmermann's 80th birthday, most of them based on talks presented at a symposium in his honor. The book shows the unifying force of a subject (Quantum Field Theory) and a person (Zimmermann). It ranges from fundamental questions in quantum physics over applications to particle physics and noncommutative geometry to the latest developments in many body theory and dynamical systems. These key ideas are elucidated by worldwide-recognized experts including Faddeev, Becchi, Buchholz, Lowenstein and Salmhofer. Readers seeking examples on how a subject has evolved, diversified and deepened over the course of several decades and how a single person can influence this process can find here a perfect illustration. Altogether, readers are treated to a high-brow intellectual adventure.

A two-time AJN Book of the Year Award winner and a 2013 Doody Core Title! This distinguished text provides top-tier guidance for advanced practice nurses on how to perform a comprehensive systematic review of available research to inform scholarly work, particularly in DNP and PhD programs. With a strategic focus on the search process and assessing the quality of the evidence, this text presents, clearly and comprehensively, all of the knowledge and skills necessary to conduct a foundational CSR in eight concrete steps. This text examines how to write a CSR proposal, final report, and a policy brief based on systematic review findings. Two finished proposals and two completed systematic reviews demonstrate each step of the process from start to finish. Additionally, the text covers software used in research queries and provides helpful strategies for effectively using the search function when seeking information. The Third Edition offers four new chapters with incisive recommendations for performing a CSR and addressing new ways CSR is being implemented in today's healthcare environment. It describes the latest methodological advances, including living systematic reviews and dominance scores for economic review. Two complete CSRs along with new and updated examples throughout the book further aid readers in their pursuit of excellence in scholarly work. New to the Third Edition: New Chapters: How to choose the right critical appraisal tool Writing the final report and disseminating the results of systematic reviews Disseminating results with how to write a policy brief and/or press release on CSR results Example of a meta-analysis using GRADE Offers increased focus on dissemination Includes new and updated examples reflecting latest trends in nursing scholarly work Key Features: Provides the knowledge and skills necessary to conduct a CSR from start to finish Teaches readers how to conduct high-quality systematic reviews Instructs readers on pertinent resources and methods for optimal library-related systematic review research efforts Describes how to best search research databases to facilitate scholarly work Includes objectives, summary points, end-of-chapter exercises, discussion questions, suggested reading, and references to enhance understanding
