important staple food crops including barley, fonio, finger millet, foxtail millet, pearl millet, proso millet, quinoa, rice, rye, tef, triticale and spelt wheat. The volume is contributed by 53 internationally reputable scientists from 14 countries. Each chapter comprehensively reviews the modern literature on the subject and reflects the authors own experience.

The year 2007 marked the bicentenary of the Act abolishing British participation in the slave trade. *Representing Enslavement and Abolition on Museums-* which uniquely draws together contributions from academic commentators, museum professionals, community activists and artists who had an

involvement with the bicentenary - reflects on the complexity and difficulty of museums' experiences in presenting and interpreting the histories of slavery and abolition, and places these experiences in the broader context of debates over the bicentenary's significance and the lessons to be learnt from it. The history of Britain's role in transatlantic slavery officially become part of the National Curriculum in the UK in 2009; with the bicentenary of 2007, this marks the start of increasing public engagement with what has largely been a 'hidden' history. The book aims to not only critically review and assess the impact of the bicentenary, but also to identify practical issues that public historians, consultants,

museum practitioners, heritage professionals and policy makers can draw upon in developing responses, both to the increasing recognition of Britain's history of African enslavement and controversial and traumatic histories more generally.

Triticale, the first successful human-made cereal grain, was produced in 1875 by crossing wheat with rye. This publication contains updated information on various aspects of triticale production, uses and marketing strategies worldwide; and it includes 13 country reports on the crop's production and research status.
