Word plexers are word-based puzzles that describe a word or phrase without actually spelling it out. For example, KCART would be backtrack since it is the word track spelled backwards. These kinds of puzzles are sometimes called wacky wordies or rebuses, although the latter is usually a picture-based puzzle. We have grouped our puzzles by difficulty, making the easiest level appropriate for students who have never seen word plexers before, and with the hardest level being nearly impossible to solve without help.

Some of the rectangles contain positive or negative integers, while others are blank. The objective is to fill in each blank rectangle with an integer in a way that "balances" the puzzle mathematically. The puzzle features three skill levels (Easy, par, and challenging) with three grid sizes: BQ Sixteen (small-grid), BQ Thirty-two (medium-grid), and BQ Sixty-four (large-grid). Solve time can range from 5 minutes for the "easy" small puzzles to hours for the "challenging" large puzzles. This puzzle is for ages 10+.

The hotter-than-hot puzzles, now in a format just for kids! Youngsters who want to start solving can have fun with these smaller sudokus that are right on their level. Instead of the usual sudoku grid, which goes from 1 to 9, most of these puzzles go only from 1 to 6. It's simpler, increases the chances for success, and minimizes frustration. At the same time, children are building their skills--and preparing themselves to work on the 22 regular-size versions that are found at the end of the book. An introduction teaches the basic sudoku rules and offers easy-to-follow hints on how to figure out which number goes where.
