A history of imperial competition, colonial cooperation, and revolutionary currents in the maritime borderlands of the early nineteenth-century Caribbean.

As the United States grew into an empire in the late nineteenth century, notions like "sea power" derived not only from fleets, bases, and decisive battles but also from a scientific effort to understand and master the ocean environment. Beginning in the early nineteenth century and concluding in the first years of the twentieth, Jason W. Smith tells the story of the rise of the U.S. Navy

and the emergence of American ocean empire through its struggle to control nature. In vividly told sketches of exploration, naval officers, war, and, most significantly, the ocean environment, Smith draws together insights from environmental, maritime, military, and naval history, and the history of science and cartography, placing the U.S. Navy's scientific efforts within a broader cultural context. By recasting and deepening our understanding of the U.S. Navy and the United States at sea, Smith brings to the fore the overlooked work of naval hydrographers, surveyors, and cartographers.

In the nautical chart's soundings, names, symbols, and embedded narratives, Smith recounts the largely untold story of a young nation looking to extend its power over the boundless sea.

City of Fortune traces the full arc of the Venetian imperial saga, from the ill-fated Fourth Crusade, which culminates in the sacking of Constantinople in 1204, to the Ottoman-Venetian War of 1499-1503, which sees the Ottoman Turks supplant the Venetians as the preeminent naval power in the Mediterranean. In between are three centuries of Venetian maritime dominance, during which a tiny city of "lagoon dwellers" grow into the richest place on earth. "Existing from the early third century BC to 63 BC, the Mithridatic kingdom of Pontos was one of the most powerful entities in the Mediterranean world. king, the erudite and cultured Mithridates VI the Great, fell victim to the expanding ambitions of the Roman Republic in 63 BC. Through a series of astute marriage alliances (one of which produced the ancestors of Cleopatra of Egypt), political acumen, and military ability, the Pontic rulers (most of whom were named Mithridates) dominated the culture and politics of the Black Sea region for over 200 years. There is a thorough exploration of the internal dynamics of the kingdom as well as its relations with the rest of the Mediterranean world, especially the ever-expanding Roman Republic"--

The year 1588 marked a turning point in our national story. Victory over the Spanish Armada transformed us into a seafaring nation and it sparked a myth that one day would become a reality - that the nation's new destiny, the source of her future wealth and power lay out on the oceans. This book tells the story of how the navy expanded from a tiny force to become the most complex industrial enterprise on earth; how the need to organise it laid the foundations of our civil service and our economy; and how it transformed our culture, our sense of

national identity and our democracy. Re-issued in trade paperback format Brian Lavery's narrative explores the navy's rise over four centuries; a key factor in propelling Britain to its status as the most powerful nation on earth, and assesses the turning point of Jutland and the First World War. He creates a compelling read that is every bit as engaging as the TV series itself.

nation that enjoyed a century of maritime supremacy thanks to the daring and navigational skill of its explorers—a tactical advantage no other country could match. Portugal's discovery of a sea route to India, campaign of imperial conquest over Muslim rulers, and domination of the spice trade would forever disrupt the Mediterranean and build the first global economy. Crowley relies on letters and eyewitness testimony to tell the story of tiny Portugal's rapid and breathtaking rise to power. personalities of the enterprising and fanatical house of Aviz. Figures such as King Manuel “the Fortunate,” João II “the Perfect Prince,” marauding governor Afonso de Albuquerque, and explorer Vasco da Gama juggled their private ambitions and the public aims of the empire, often suffering astonishing losses in pursuit of a global fortune. Also central to the story of Portugal’s ascent was its drive to eradicate Islamic culture and establish a Christian empire in the Indian Ocean. besieged Indian port cities in their attempts to monopolize trade. The discovery of a route to India around the horn of Africa was not only a brilliant breakthrough in navigation but heralded a complete upset of the world order. For the next century, no European empire was more ambitious, no rulers more rapacious than the kings of Portugal. In the process they created the first long-range maritime empire and set in motion the forces of globalization that now shape our world.
