In *The Rhetoric and Medicalization of Pregnancy and Childbirth in Horror Films*, Courtney Patrick-Weber argues that the medicalization of pregnancy and childbirth traumatizes pregnant people in a number of ways, even as many people believe the shift toward medicalization has improved conditions for pregnant people. Patrick-Weber analyzes a selection of horror films, including *The Void* and *Black Christmas*, to demonstrate not only evidence of this trauma on a visceral level, but also how horror films can reflect and contribute to cultural conversations surrounding pregnancy and childbirth. While horror films are often neglected as vital sources of intellect and analysis, many of these films use their subversive viewpoints on cultural issues to offer a unique perspective that can ultimately help to shape the way society views them. Patrick-Weber reminds us that pregnancy and childbirth can be traumatic events, both physically and emotionally, as she discusses the current conversations surrounding the issue and critiques the "advancement" of medicalization. Scholars of film studies, gender studies, rhetoric, and medicine may find this book particularly useful.

Many infertile couples turn to adoption, but healthy babies can be hard to come by. Unless you know the right people. David and Judy were a happy young couple, living in the Boston suburbs. Good jobs, good friends. The only thing missing was a child. After a long time trying, they were finally expecting! But joy turns to horror for them, and in the aftermath of stillbirth, they are left with more questions than answers. As they struggle to move on with their life and become pregnant again, David suddenly finds himself the target of an unknown killer, and now only finding the truth will keep them safe. *The Baby Factory* takes a common situation and spools it out into a thrilling conspiracy tale, as David moves ever closer to the unbelievable truth.

Whereas biomedical and feminist literature treat abortion, miscarriage, and stillbirth as differently conceptualized events, this collection explores the connections between these three categories. How have feminist debates and strategies around reproductive choice invigorated the cultural conversation about miscarriage and stillbirth? How can we imagine more nuanced engagements with the spectrum of experiences that are at stake when a pregnancy ends? And how can we effectively create a space where pregnant people contend with the ways that loss makes meaning for those who grieve and/or celebrate the end of pregnancy? This collection centres pregnancy loss as an embodied and social phenomenon within a framework that understands pregnancy as a process with no guaranteed outcomes. *Interrogating Pregnancy Loss* considers pregnancy as an epistemic source, one that has the capacity to reveal the limits of our collective assumptions about temporality, expectation, narrative, and social legitimacy. By interrogating loss, this collection argues that the lessons learned from loss have the capacity to serve our collective understandings of both the expected and unexpected rhythms of social and reproductive life.

For those who have lost a child to death, Jack Hayford provides compassionate answers to troubling questions such as, What happened to my baby after it died? Will I ever see my baby again - and will I recognize him? what happens if I've had an abortion? Does God have a reason for letting my child die? God's Word shines with hope in the dark night of human pain. God showed his tenderness when David lost the child he had with Bathsheba shortly after its birth. In his pain and grief, David spoke the word of revelation - reassuring word of God's truth - saying, "I will go to (my child) but he will not return to me" (2 Samuel 12:19 - 23). The freeing truth of the Word of God promises that, like David, you will hold your child again in heaven.

Designed for clinicians delivering postpartum care, including clinicians, midwives, OB-GYN nurse practitioners, and women's health practitioners, this text overviews the six different mood and anxiety disorders that may present during a woman's postpartum year. *Postpartum Mood and Anxiety Disorders* focuses on assessment, screening tools, diagnosis, treatment, and implications for practice, and includes case studies to integrate the process.

When your baby dies before birth, you experience an extraordinary grief. You never get to hear your baby's voice nor see life in your baby's eyes. Still, your baby lived. Your baby came into this world. Your baby's existence is important and real. This small book offers tailored information and support for parents

experiencing the early hours, days, and weeks that follow the death and birth of their beloved baby. Stillbirth is always a devastating shock, a heartbreaking collision of birth and death that leaves parents helpless. In this accessible book, you will find comfort and ideas for affirming and honoring your precious baby's life.

When Love & Sorrow Embrace offers Biblical encouragement to parents grieving a miscarriage. Based on beloved Biblical encounters with God Himself, readers find hope, encouragement and healing.

The U.S. infant mortality rate is among the highest in the industrialized world, and Black babies are far more likely than white babies to die in their first year of life. Maternal mortality rates are also very high. Though the infant mortality rate overall has improved over the past century with public health interventions, racial disparities have not. Racism, poverty, lack of access to health care, and other causes of death have been identified, but not yet adequately addressed. The tragedy is twofold: it is undoubtedly tragic that babies die in their first year of life, and it is both tragic and unacceptable that most of these deaths are preventable. Despite the urgency of the problem, there has been little public discussion of infant loss. The question this book takes up is not why babies die; we already have many answers to this question. It is, rather, who cares that babies, mostly but not only Black and Native American babies, are dying before their first birthdays? More importantly, what are we willing to do about it? This book tracks social and cultural dimensions of infant death through 58 alphabetical entries, from Absence to ZIP Code. It centers women ' s loss and grief, while also drawing attention to dimensions of infant death not often examined. It is simultaneously a sociological study of infant death, an archive of loss and grief, and a clarion call for social change.
