This single-volume reference provides an alternative to traditional marketing research methods handbooks, focusing entirely on the new and innovative methods and technologies that are transforming marketing research and practice. Including original contributions and case studies from leading global specialists, this handbook covers many pioneering methods, such as: Methods for the analysis of user- and customer-generated data, including opinion mining and sentiment analysis Big data Neuroscientific techniques and physiological measures Voice prints Human-computer interaction Emerging approaches such as shadowing, netnographies and ethnographies Transcending the old divisions between qualitative and quantitative research methods, this book is an essential tool for market researchers in academia and practice.

This book is a complete introduction to the power of R for marketing research practitioners. The text describes statistical models from a conceptual point of view with a minimal amount of mathematics, presuming only an introductory knowledge of statistics. Hands-on chapters accelerate the learning curve by asking readers to interact with R from the beginning. Core topics include the R language, basic statistics, linear modeling, and data visualization, which is presented throughout as an integral part of analysis. Later chapters cover more advanced topics yet are intended to be approachable for all analysts. These sections examine logistic regression, customer segmentation, hierarchical linear modeling, market basket analysis, structural equation modeling, and conjoint analysis in R. The text uniquely presents Bayesian models with a minimally complex approach, demonstrating and explaining Bayesian methods alongside traditional analyses for analysis of variance, linear models, and metric and choice-based conjoint analysis. With its emphasis on data visualization, model assessment, and development of statistical intuition, this book provides guidance for any analyst looking to develop or improve skills in R for marketing applications.

A brand new textbook with an innovative and exciting approach to marketing strategy. Moving away from the outdated 4Ps model to a new approach that reflects real-world companies responding to a differing and dynamic customer base. Research-based and action-orientated, it equips students with the tools to succeed in today's competitive markets.

Academically thorough and up-to-date quantitative and qualitative market research methods text for business and social science students.

Modern Advances in Tourism Research provides a thorough assessment of state-of-the-art academic research in this field of economic science. The authors start by scoping the scene of tourism research. They progress to a comprehensive analysis of themes of particular interest for researchers and academics interested in the workings of the tourism markets, such as new analysis frameworks in tourism economics and new operational tools in tourism research.

Global Marketing provides students with a truly international treatment of the key principles that every marketing manager should grasp. International markets present different challenges that require a marketer to think strategically, and apply tools and techniques creatively in order to respond decisively in a fiercely competitive environment. Alon et al. provide students with everything they need to rise to the challenge: Coverage of small and medium enterprises, as well as multinational corporations, where much of the growth in international trade and global marketing has occurred. A shift toward greater consideration of services marketing as more companies move away from manufacturing. A focus on emerging markets to equip students with the skills necessary to take advantage of the opportunities that these rapidly growing regions present. Chapters on social media, innovation, and technology teach students how to incorporate these new tools into their marketing strategy. New material on sustainability, ethics, and corporate social responsibility; key values for any modern business. Short cases and examples throughout the text show students how these principles and techniques are applied in the real world. Longer cases provide instructors and students with rich content for deeper analysis and discussion. Covering key topics not found in competing books, Global Marketing will equip students with the knowledge and confidence they need to become leading marketing managers. A companion website features an instructor's manual with test questions, as well as additional exercises and examples for in-class use.

Measuring and Improving Patient Satisfaction provides a detailed "how-to" approach to establishing an effective patient satisfaction measurement program. The reader learns how to measure patient satisfaction and act upon the information obtained from patient satisfaction surveys. The book is based on the author's own experience in creating and implementing a patient satisfaction measurement program for the Med-Partners Friendly Hills Health Network in Southern California.
