Nutrition through the lifecycle

Robust support for nutrition research across the lifespan is needed to provide Americans with a clear understanding of the role of nutrition in maintaining a healthy, active life," wrote McGovern, the ranking member of the Subcommittee on Nutrition and co-chair of the House Hunger Caucus.

Nutrition Across the Lifespan | Tufts Now

Ongoing studies are investigating whether the consumption of 30 percent fewer calories (undernutrition, not malnutrition) slows aging and age-related disease and extends life spans in nonhuman primates. There is no evidence that severe energy restriction would extend the human life span beyond its current maximum of 115 to 120 years. Jean Weininger
