Functional description Enclosure

Acces PDF Rittal Panel Ac Service Manual

cooling units are designed to dissipate heat from enclosures by cooling the air inside the enclosure and so protect the temperature-sensitive components.

They are built into the side or rear panel or into the door of the enclosure.

Air diversion components are available as accessories. To this end, cut the side panel or door of the enclosure – please refer to the Rittal catalogue. Be sure as per the drilling template included with the enclosure. It is important to ensure even air circulation inside the enclosure, and drill the relevant holes.
