Trading and investing can be tough – most fail. The human mind is to blame. It's prone to emotion, cluttered with distractions like Twitter and social media, easily trapped by scams. But it's possible to make money in the markets – and to do so reliably. Robbie Burns, aka The Naked Trader, has been trading successfully from his home for 15 years – making over £2m tax-free (while eating a lot of toast and watching Game of Thrones). He's also met and helped thousands of fellow traders at his seminars, seen every possible trading meltdown, and knows exactly what can go wrong – but also how to put it right. In Trade Like a Shark, Robbie uses his unique firsthand experience and the real-life stories traders have shared with him to expose exactly how the human mind can play havoc with your trading. At the same time he reveals his tried-and-tested methods for overcoming it, showing how to be a shark, gobbling up money from the 'fish' who are full of fear, greed and other emotions. (And also why modelling yourself on Mr Spock can work wonders.) If you've run into problems trading in the stock market – or just want to reinforce good habits – there is no better or wittier guide to the pitfalls that are out there, and some surprisingly effective ways to overcome them. It's a must-read book on trading psychology – without the jargon. Read it and take your trading to the next level now!

How top traders made huge profits during the most momentous market events of the past century Financial and commodity markets are characterized by periodic crashes and upside explosions. In retrospect, the reasons behind these abrupt movements often seem very clear, but generally few people understand what's happening at the time. Top traders and investors like George Soros or Jesse Livermore have stood apart from the crowd and capitalized on their unique insights to capture huge profits. Engaging and informative, The Greatest Trades of All Time chronicles how a select few traders anticipated market eruptions?from the 1929 stock market crash to the 2008 subprime mortgage meltdown?and positioned themselves to excel while a majority of others failed. Along the way, author Vincent Veneziani describes the economic and financial forces that led to each market cataclysm and how these individuals perceived what was happening beforehand and why they decided to place big bets, often at great risk and in opposition to consensus opinion at the time. Traders discussed include George Soros, Jesse Livermore, Paul Tudor Jones, John Templeton, and John Paulson Provide contemporary traders and investors with insights on how great traders make great trades Offers insights on market forecasting, mass psychology, and the importance of personal conviction in trading At a time when many investors are looking to the past for answers to the future, this book brings important historical moments in the financial markets to life.

provides readers of *The Logical Trader* with a full examination of the theory behind the ACD Method and the examples and real-world trading stories involving it. Mark B. Fisher (New York, NY), an independent trader, is founder of MBF Clearing Corp., the largest clearing firm on the NYMEX. Founded in 1988, MBF Clearing has grown from handling under one percent of the volume on the NYMEX to nearly twenty percent of the trades today. A 1982 summa cum laude graduate from the Wharton School of Business, University of Pennsylvania, Fisher also received his master's degree in finance and accounting from Wharton. New technology and the advent of around the clock trading have opened the floodgates to both foreign and domestic markets. Traders need the wisdom of industry veterans and the vision of innovators in today's volatile financial marketplace. The Wiley Trading series features books by traders who have survived the market's ever changing temperament and have prospered—some by reinventing systems, others by getting back to basics. Whether a novice trader, professional or somewhere in-between, these books will provide the advice and strategies needed to prosper today and well into the future.

You can make large profits by trading commodities—but you'll need significant practical knowledge of the associated risks and market characteristics before you start. *A Trader's First Book on Commodities* is a simple, practical and useful guide for new commodities traders. Author Carley Garner provides specific guidance on accessing commodity markets cost-effectively, avoiding common beginners' mistakes, and improving the odds of successful, profitable trades. Drawing on her extensive experience teaching traders, Garner shows how to calculate profit, loss, and risk in commodities, and choose the best brokerage firm, service level, data sources, and market access for your needs. She'll help you:

- Master the basics of trading commodities painlessly, avoiding beginners mistakes
- Get what you need, and prevent paying for what you don't need
- Know what you're buying, what it costs, the returns you're earning and the risk you're taking
- Predict price, manage risk, and make trades that reflect your analysis

Garner demystifies the industry's colorful language, helps you clearly understand what you're buying and selling, and walks you through the entire trading process. She concludes with a refreshingly new look at topics such as trading plans, handling margin calls, and even maintaining emotional stability as a trader. "This book provides the type of information every trader needs to know and the type of information too many traders had to learn the hard and expensive way. Carley offers practical need-to-know, real-world trading tips that are lacking in many books on futures. It will help not only the novice trader, but seasoned veterans as well. This book will serve as a must-have reference in every trader's library." --Phil Flynn, Vice President and Senior Market analyst at PFGBest Research, and a Fox Business Network contributor "Refreshing—It's nice to see a broker who has actually been exposed to the professional side of trading and who bridges that chasm between exchange floor trading and customer service. Carley takes the time to explain verbiage, not just throw buzz words around. A good educational read in my opinion." --Don Bright, Director, Bright Trading, LLC "This book has the perfect name, the perfect message, and the necessary information for any beginning trader. Take this book home!" --Glen Larson, President, Genesis Financial Technologies, Inc. "As a 35-year veteran of the CME/CBOT trading floor, I can tell you...those who think they can begin trading commodities without knowing the less talked about topics that Carley discusses in *A Trader's First Book on Commodities* are sadly mistaken. Anyone who trades their own account, or would like to, should read this book." --Danny Riley, DT Trading
